Experience

- Years of customer success and sales means the experience and needs of the customer is always top of mind
- Leading diverse groups of 8 -15 to stay on track during project implementation.
- Planning new stores means that I'm a big picture thinker while maintaining and eye for details
- Quick prioritization of tasks, along with excellent time management skills ensures deadlines are met from always working in fast-pace and dynamically changing environments
- I integrate easily into new teams and bring an open perspective because of all the different working environments I've contributed to.
- Quantitative and qualitative research.
- Obsessed with providing clean and clear wire-framing, user stories, and, project planning steps.

Hello!

I am a design-minded and community-focused Web Developer with a flare for colour and composition. I'm always focused on the customer experience and commerciality in my contributions to an excellent product. I confidently prioritize tasks in dynamic projects and environments.
